PROFILE

Independent Odoo Techno-Functional Architect & AI Automation Engineer | Odoo 18 Certified Functional Consultant with **5+ years** of experience delivering **22 end-to-end ERP implementations** across **13 countries** — from requirement analysis and solution architecture to development, deployment, and post-go-live support.

Previously led a **7-developer team** at **Synodica Solutions** (Odoo Silver Partner), managing multiple concurrent projects while driving client strategy, hiring, and technical mentorship. Now working independently — architecting Odoo platforms and AI-driven automation for clients across the **GCC, Europe, and Asia-Pacific**. Experienced across **Odoo 11.0–19.0**.

I specialize in **complete project ownership** — handling client communication, gap analysis, solution design, custom development, integrations, server setup, and user training.

CORE COMPETENCIES

TECHNICAL Python · PostgreSQL · JavaScript / OWL · XML · REST APIs · Git · Linux · AWS · GCP · Odoo.sh · Odoo 11.0–19.0

FUNCTIONAL Accounting · HR · Payroll · Sales · Purchase · Inventory · Manufacturing · Quality · CRM · Helpdesk · Subscription · Website · Expense · Dashboards · Project · Timesheet

LANGUAGES English (Professional) · Hindi (Native) · Gujarati (Native)

SERVICES

ERP Implementation · ERP Rescue · AI + Odoo Automation · Functional Consulting · Custom Module Development · Third-Party Integration · Server Setup & Deployment (AWS / GCP / Odoo.sh / Contabo)

PROFESSIONAL EXPERIENCE

Independent — *Odoo Techno-Functional Architect & AI Automation Engineer*

Direct-to-Client Engagements

Jul 2026 – Present

- Architecting and delivering an end-to-end Odoo ERP platform for a New Zealand-based telecommunications group under a long-term build contract — full ownership from requirements through go-live
- Delivering direct-to-client Odoo implementation, ERP rescue, and AI-automation consulting for businesses across the GCC, Europe, and Asia-Pacific
- Maintaining a **100% successful go-live** track record across all engagements to date

Synodica Solutions Pvt. Ltd., Surat — *Odoo Silver Partner*

Development Team Lead

Sep 2024 – Jul 2026

- Led 7 developers across 4 concurrent projects; driving architecture decisions, resource allocation, and delivery timelines
- Led talent acquisition — conducting technical interviews and finalizing hires for the development team
- Spearheaded client strategy: requirement analysis, gap assessment, solution design, and go-live planning
- Increased team productivity by **30%** by introducing AI-driven development workflows and mentoring developers
- Reduced project delivery delays by **25%** through structured & improved deployment processes, and streamlined workflows

Senior Software Engineer (*concurrent with Team Lead role*)

Mar 2024 – Jul 2026

- Delivered **full-cycle ERP projects** spanning HR, Retail, Manufacturing, Facilities, and IT Services — from requirement gathering and client communication to development, server setup, and go-live support
- Independently managed client relationships, translating business needs into technical solutions and functional workflows, achieving **20%** improvement in client retention

- Improved development speed by **15%** by enforcing coding standards, conducting code reviews, and optimizing workflows

Software Engineer

Dec 2022 – Feb 2024

- Revamped a **10,000+ line legacy module**, improving system performance by **30%** and reducing technical debt
- Delivered **4 projects**, increasing client satisfaction by **20%** by reducing turnaround time and minimizing rework

Junior Software Engineer

Sep 2021 – Nov 2022

- Customized and maintained Odoo applications including module design, troubleshooting, and testing
- Applied coding standards and contributed to feature development within Agile teams

KEY PROJECTS

Premium Car Servicing & Spare Parts Reseller — KSA

- Architected end-to-end HR, Payroll, Accounting & Sales ecosystem for **300+ employees** across multi-company, multi-branch setup — reducing manual work by **60%**
- Streamlined overtime & violation management with full labor law compliance; built employee self-service portal, shift management with approvals, and end-of-service module per local regulations
- Integrated WooCommerce (**1,000+ orders/month**), ZATCA e-invoicing (**1,500+ invoices/month**), and a WhatsApp helpdesk bot — cutting ticket response time by **40%** while migrating the client's full accounting process to Odoo
Modules: Accounting, Payroll, HR, Attendance, Sales, Purchase, Helpdesk, CRM, Appraisals, Inventory, Expense, Timeoff, Portal

Pharma & Medical Equipment Manufacturer

- Orchestrated full manufacturing workflow — raw materials to finished goods — with strict regulatory compliance for **225 employees**, cutting production tracking errors by **50%**
- Customized Shopfloor module: custom production flows, batch generation, split work orders, unbuild MO logic, and samples workflow; revamped QC process at every production stage
- Configured structured sales workflow (Quotation → Proforma → Sale Order → Tax Invoice) across **5+ warehouse locations**, and engineered a Tally XML bridge that consolidated **3 separate systems into 1 unified ERP** with cost-per-employee, per-process, and per-department dashboards
Modules: Manufacturing, Quality, Sales, Accounting, Purchase, Inventory, HR, Payroll, Attendance, Dashboards, Maintenance, Repairs

Elevator Maintenance & Subscription Company

- Developed automated maintenance scheduling tied to subscription plans for **35+ technicians** and **70 internal users**, reducing missed service visits by **35%**
- Crafted custom WhatsApp flow serving **4,000+ customers** — enabling self-service for subscriptions, visit reports, maintenance requests, and payments, replacing **50%** of the call center team
- Connected LanaTime attendance devices and Messagebird contact sync, with SMS fallback notifications ensuring **98% customer notification** rate across subscription, maintenance, and service updates
Modules: CRM, Subscription, Maintenance, Attendance, Contacts

IT Service Company — Hourly Billing & Subscription Platform

- Designed subscription-based hourly billing system: customers purchase monthly hour packages with automatic allocation to projects and auto-renewal on payment, eliminating **100% of manual billing**
- Built full customer portal — track consumed hours, task progress, and purchase extra hours directly from sale orders with real-time project allocation, reducing client queries by **45%**
- Set up Backblaze storage integration (replacing default Odoo.sh filestore) and managed Odoo.sh deployment; implemented onboarding with auto-fraud detection, mandatory 2FA, and multi-level purchase approvals
Modules: Subscription, Project, Timesheet, Sales, Purchase, Website

CERTIFICATIONS

- **Odoo 18 Functional Certification** — Odoo S.A. · 2025
